DETAILED ACTION

1. This communication is responsive to your preliminary amendment filed 3/23/04. Claims 1-16 are currently pending in this application.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Boskamp et al. P.N. 6,249,121 (Boskamp).

Boskamp discloses an RF coil for use in a Magnetic Resonance Imaging system as depicted in Fig.1. Applicant's attention is directed to Fig. 4 which shows, two coil elements 82 in parallel that carry currents I(1) and I(2) respectively. The ratio of these currents can be adjusted by capacitors 78-81. See for example lines 30-50 of col. 6. Boskamp meets all the limitations of the claims at issue.

Allowable Subject Matter

5. Claims 4-8 and 12-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2859

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Van Vaals and Kaufman et al. disclose parallel coil elements in MRI coils that have provision for adjusting the current in each coil. Note the abstract of each disclosure.
